## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a method for producing an antibody that recognizes a target antigen, comprising immunizing a non-human animal.

Group II, claim(s) 4-9, 19, drawn to a method for producing an antibody that recognizes a target antigen, comprising producing a transgenic non-human animal and immunizing the non-human animal.

Group III, claim(s) 10,11,20, drawn to an antibody.

Group IV, claim(s) 12-18, drawn to a transgenic non-human animal into which a gene encoding a viral envelope protein is introduced.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions I-IV lack a unifying special technical feature. SATOI et al., J. Virol., 2001, Vol. 75, No. 24, pages 12121-12127, discloses a transgenic mouse having a plasmid inserted therein, said plasmid having been modified with the gene that codes the envelope protein of HCV, which is a membrane protein from a virus.

Since the claimed subject matter was known from the prior art document of SATOI et al.,

Art Unit: 1632

the subject matters of claims 1-20 are not so linked as to form a single general inventive concept (Rule 13.1 PCT) as they appear not to be linked by a new and inventive common special technical feature in the sense of Rule 13.2 PCT by taking into account the state of the art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
